

MODEL EVALUATION REPORT: DECISION TREE CLASSIFIER

1. Metadata Summary

This diagnostic report evaluates the performance of the **Decision Tree Classifier** algorithm trained on the dataset `iris_flower.csv`, target variable '**Species**'.

Parameter	Value
Algorithm ID	decision_tree_classifier
Task Type	Classification
Total Target Classes	3
Features Count	4
Training Time (seconds)	0.0038 seconds
Evaluation Timestamp	2026-06-01 12:32:20

2. Training Parameters

Hyperparameter Key	Configured Value
criterion	gini
missing_strategy	median
scaling_strategy	standard
test_size	0.2

3. Evaluation Results

Metric Name	Performance Score
ACCURACY	1.00000
PRECISION	1.00000
RECALL	1.00000
F1 SCORE	1.00000
ROC AUC	1.00000

4. Diagnostic Visualizations

Confusion Matrix Heatmap
